

Amazon Sales Analytics Dashboard Project

Prepared by: Arbaz Khan

Project Overview

This project analyzes Amazon sales data using Python, SQL, Excel, and Power BI. The objective was to identify revenue drivers, order fulfillment trends, and category performance.

Order Status Analysis

Key findings: Shipped orders = 5,522, Delivered to Buyer = 2,832, Cancelled = 1,426, Returned to Seller = 216. Cancellation rate was approximately 14.26%.

Category Revenue Analysis

Set category generated the highest revenue (₹31.18 lakh), followed by Kurta (₹16.03 lakh). These categories contributed the majority of overall sales revenue.

total orders by labels
